LOCAL INTELLIGENCE.

LOCAL MINING REVIEW. For the Week Ending Jan. 3, 1874.

The mining outlook presents at pres-

review to-day. The splendid rich review to day. The splendid rich spare no pains to render passengers competing in the Newark mitted to their charge comfortable, and mine is, however, worthy of particular to bring them through safely and on time. specimen extracted from the Newark mention, as it holds out more than the hope that the Newark will develop soon into a very valuable mine. The portion of the camp in which the Bowery, Portland, Silver Peak and Condor are located is throwing out some very encouraging signs of future improvement. Pioche stocks have held their own quite well the past week in the San Francisco Stock Board, notwithstanding the great excitement in stocks belonging to the Comstock range. Gentlemen thoroughly conversant with mining unite in the opinion that the mines of Eiy District will receive a new impetus soon.

MEADOW VALLEY. No. 3 shaft 118 feet below the 10th sta-tion; will start a drift off from the elev-enth station the latter part of the week. The west drift on the tenth station is in The west drift on the tenth station is in 13 feet, and looks very promising indeed. The cast drift on the ninth station is in 414 feet. The east drift on the eighth station is in 428 feet. A winze has been sunk from that drift down to the vein, and is down 64 feet. The east drift on the 520-foot level is in 353 feet, and in about 40 feet further expect to intersect the body of one being worked from the 620-foot level. Summit shaft down 890 feet. Work is progressing satisfactorily feet. Work is progressing satisfactorily throughout the mine. Ore dump full, not having been able to clear it on ac-count of the bad roads.

WASHINGTON AND CRECLE.

Shipped for the month of December ballion to the amount of \$33,191.58. Now sinking the western prospect winze, ore continuing the same as at our previous report. Also raising over both winzes in ore. The want of air for the december prevents are further or being the same as a supplement prevents are further or being the same and the same are being the same are same as a supplement prevents are further or being the same are same as a supplement prevents are supplement. present prevents any further work being done in the mine. In addition to this work, the Mazeppa shaft, now belonging to the Washington & Creole Company, has been sunk and timbered 100 feet. A contract has been let to sink the shaft 100 feet further. The number of men permanently employed in the mine, is 65. Will commence shipping ore again about the 15th inst.

NEWARK.

We saw yesterday a very rich specimen of ore taking from the Newark a few days ago. The specimen weighs 46 pounds, and all the indications are that will assay but little, if snything below \$1,000 to the ton. The dump begins to make a respectable showing of ore. Considering that there has been no stoping done, this presents the mine in a very favdone, this presents the mine in a very fav orable aspect. The force at work has been increased somewhat during the week. The mine looks quite well

AMERICAN PLAG.

Shaft now down 900 feet, and will commence putting in the ninth station immediately. Drifting will commence from this shaft to-day to cut the vein. The ground being hard, it is difficult to determine when the vein will be cut. The mill has just got through with ore from the American Flag mine. The dry kiln is undergoing repairs which it will take about ten days to complete. PIOCHE.

Now down 466 feet, and sinking rapidly. It is the purpose of the manager to continue sinking until a depth of 1,000 feet is made. The hoisting works over the new shaft operate entirely to the satisfaction of the Superintendent and others who have given the matter attention. The mine generally looks favorably.

Pushing the drift rapidly. No partieular change to report at present, but ex-pect to have something encouraging to note about the Portland soon.

Started a new drift east, from which ore is being taken out. The drift south continues in country rock, with indications of cutting the vein soon.

PEAVINE. Connection has been made with the new shaft, from which ore is being taken. The mine throughout looks promising. SILVER PEAK.

· CRIEF BAST.

Preparations are being made to com-PAGE AND PANACA.

Still sinking and drifting for the main ledge, with very good prospects. INGOMAN. Prospecting continues as at our review

Tur Festival for the benefit of the Presbyterian Church will take place at Brown's Hall next Monday evening at 7% o'clock precisely.

FAST TIME, RAIN OR SHINK .- Mr. Holland, who arrived in town yesterday at. from the best sources the information ternoon, left Eureka on Friday morning that the amount of bultion shipped from at 8 o'clock, in one of Woodruff & Ennor's Concord coaches; arrived at Hamilton at 3 p. m. of that day; left Hamilton by Travis & Co.'s line at 5 o'clock on Friday evening, while a heavy snowstorm was beating upon the heads of all The mining outlook presents at present writing rather a tame aspect, owing, in a great measure, to the fact that the holidays had to be observed, and of course the labors of life were neglected in a slight degree. New Year's Day occurring on Thursday, the day following was taken to "straighten up," leaving only one day (Saturday) for active labor, and as a general thing real hard work was not engaged in. But to-morrow, being the first Monday in 1874, and all baving had a pleasant holiday season and a fair chance to arrange plans for the future, mining operations will henceforth be pushed ahead vigorously. We have but little to note in regard to the mines of the district beyond what is stated in the body our review to-day. The splendid rich specimen extracted from the Newark is observed to the Newark mining operations the body our review to-day. The splendid rich specimen extracted from the Newark is pointed to the more of the district beyond what is estated in the body our review to-day. The splendid rich specimen extracted from the Newark mining operators and the properties of the district beyond what is estated in the body our review to-day. The splendid rich specimen extracted from the Newark was readed to it. The storm was soo heavy that it was with the greatest difficulty that the driver exposed to it. The storm was soo heavy that it was with the greatest difficulty that the driver exposed to it. The storm was soo heavy that it was with the greatest difficulty that the driver exposed to it. The storm was soo heavy that it was with the greatest difficulty that the driver exposed to it. The storm was shearly that the driver exposed to it. The storm of a facing the storm of a sterior to the coach. They reached Patterson at 7 o'clock yestergers were transferred to the coach. They reached Patterson at 7 o'clock in the afternoon. The time from Eureka to Picche including all the passengers were transferred to the coach. They reached Patterson at 7 o'clock in the afternoon. The time from in 21½ o'clock in the afte who were exposed to it. The storm was

> AN APPEAL TO CHARITY. - Notwithstanding the superiority of our surroundings as compared with those in the Eastern States, where the sufferings among the poorer touch every heart with pity, isolated cases arise from accident which make a direct appeal to dent which make a direct appeal to man's charity and generosity. A case was brought to our notice yesterday morning which is worthy of the notice of the people generally of Pioche. We allude to the case of Barney Bradley, who, from an injury in a mine some time since, is in danger of losing his sight entirely. In order to afford him the means of getting where he may have sign entirely. In order to anoth him the means of getting where he may have the best treatment a benefit in his behalf is suggested by those who are interesting themselves in his behalf. A concert is proposed, for some evening this week, which will afford all an opportunity to obtain a musical treat and at the same time contribute their mile in aid. same time contribute their mite in aid of a good cause.

FESTIVAL FOR THE BENEFIT OF REV. H. B. MACBRIDE. - To-morrow evening there will be given by the ladies of Pioche a splendid collation, the proceeds of which will be appropriated to Rev. H. B. Mac- 3 cans for \$1 25. bride, for some months in charge of the Presbyterian Church, but who is about leaving Pioche. The collation will be spread at Brown's Hall at 7% o'clock, and a genaral invitation is extended.
As a further inducement to our bachelor
friends, it should be noted that two fine
cakes will be cut for their especial benefit. In one of these will be placed an
"engagement ring," in the other a
"wedding ring." We are sure that those
who attend will pass a pleasant time.
Admission free.

Monday (to-morrow) the public schools of Pioche will be reopened. The Gram mar School is under the management of Mr. Schoppmann; the Intermediate is presided over by Mrs. Watt, and the Primary by Mrs. Wilmarth. We hope the pupils will make good progress dur-ing the term upon which they enter to-merrow.

THE balmy, bright sunshine of yesterday formed a striking contrast to the dreary, dismal day preceding. Thawing continued all day, and at such a rate the snow will rapidly disappear. Last night was very clear, and the moon, as re-flected by the snow-clad hills around, made it almost as light as day. The in-dications are that we will have a season of pleasant weather. of pleasant weather.

DISTRICT COURT .- The District Court will meet to-morrow (Monday) morning at 10 o'clock. Jurors should make it a point to be on hand at the appointed hour.

BOWERT.

Work progressing as usual. No change to note.

CONDOR.

Still drifting for the ledge.

THE INJURED.—We yesterday visited Marsh Pierce and Jacob Henry, two of the men hurt by an explosion in the Raymond & Ely mine on the 27th ult., and we are glad to say that they are getting along well.

Mr. Pierce, who was the most severely injured of the three, still auffers somewhat, but everything seems favorable in regard to his case.

Mr. Henry still keeps his left hand and one finger on the right hand bound up, but he will soon be able to resume work. The other man hurt at the same time, was yesterday, so we were informed, getting along well.

We are under obligations to Charley Wiederhold for his customary weekly supply of newspepers, periodicals and pictorials. His stock comprises everything desirable in the line of reading matter. Go to Wiederhold's and get somewhat to the presbyterian Church will take place at presbyterian Church will take place at present the continue of the line of reading matter. BULLION Surprep IN 1873 .- We obtain Pioche by express during the past year was \$3,467,551.47. This is equal to was \$3,467,561.47. This is equal to \$298,963.65 each calendar month, \$66,683.87 per week, \$9,526.27 per day, \$396.92 an hour, \$6.61 a minute, and at every tick of the clock 11 cents. The total amount would coin 6,935,123 half dollars, and if these were placed in a straight line would reach 240,869 yards, or nearly 137 miles, sufficient to enclose with half-dollar pieces a body of land 3414 miles square.

Night School.-E. Schoppmann will open his night school to-morrow (Monlay) evening at 71/2 o'clock, in the old printing office on Main street. A very favorable opportunity is now afforded adults to acquire proficiency in reading, writing and arithmetic, and we hope they will not allow such an opportunity to pass unimproved.

Ine Phillips has so nearly sold out that he will be able to close out on the 16th. Those who want to get good bargains must apply on or before that date.

PH. FELSENTHAL came in by the Hamilton stage yesterday afternoon from the

Arrangements have been made whereby passengers desiring to visit Denver, on their way East, can avail themselves of an excursion rate from Cheyenne to Denver, and return, at greatly reduced rates.

For particulars and all information in regard to passage, apply at the ticket offices.

Passengers should be careful to secure their passage tickets to all eastern and southern points via Omaha, and thus avail themselves of a through sleeping-car, comfortable accommodations and quick time.
